

Buenos Aires Semester January to June 2013

Computability, Complexity and Randomness

Departamento de Computación
Facultad de Ciencias Exactas y Naturales
Universidad de Buenos Aires

<http://www-2.dc.uba.ar/ccr/>

The CCR Semester is an international gathering of mathematicians and computer scientists focused on computability theory, randomness, computable structures and reverse mathematics. Activities include a graduate course, subject-driven workshops exploring the research topics and speaker-driven seminars highlighting open problems.

Program Organizers

Noam Greenberg
Joseph S. Miller
Antonio Montalbán
Theodore Slaman

Victoria University of Wellington, New Zealand
University of Wisconsin, Madison, USA
University of California, Berkeley, USA
University of California, Berkeley, USA

Local Organizers
